### Carrot Creek Tower Road project modified

Yellowhead County has been working with an engineering firm to design a paved road structure and to acquire the necessary road right of way for the project from adjacent landowners.

Council and administration were able to either reach agreement or modify the design with all but one landowner with respect to the project.

These modifications will include a smaller ditch at the north end of the road, entering onto Highway 16. While this solution is not ideal, it will be sufficient for maintaining a paved road.

One landowner refused to sell without special compensation. Yellowhead County Council has since decided to shorten the project by approximately two miles.

Council has never provided special compensation in the past and saw no reason to do so in this circumstance.

At their regular meeting on May 27, Council voted to proceed with the recommended proposals for dealing with the landowner issues and to stop the project at the south portion of Plan 012-1215, Block 1, Lot 2, NW 3-53-13-W5M.

Infrastructure Services has constructed a tentative timeline in which the engineering will be completed this year, the base reconstruction in 2009 and paving in 2010.

Yellowhead County appreciates all the residents' cooperation in adjusting to these inconveniences in order to complete a new road.

If there are any questions or concerns regarding this roadwork, please contact Infrastructure Services Director Don O'Quinn at the Edson office.

Yellowhead County is fully committed to ensuring all of its residents have safe and dependable access on county roads. This is in keeping with its mission of building a better community for present and future generations.
